SUMMARY

Computer Science Undergraduate specializing in full-stack development and AI-driven solutions. Practical experience building scalable applications using Java (Spring Boot), JavaScript (Angular/React), and Python. Proven ability to automate ETL workflows and build/deploy containerized ML pipelines on GCP and AWS. Eager to contribute to a collaborative, AI-focused team and grow within a structured learning environment.

PROFESSIONAL EXPERIENCE

Automation & Data Engineering Project — Santani Hotels

Jan 2025 - June 2025

- Developed **Python ETL scripts** for ingesting marketing analytics from Google Ads, Meta Ads, automating 90% of the workload
- Designed efficient database schemas for BI tools, which lead to a structured lookup strategy.
- Retrieved data using APIs with OAuth2 credentials (e.g., Google Ads) for analytics and reporting purposes
- Designed modular ETL components, allowing easy scaling across additional ad platforms (e.g., LinkedIn Ads, GA4) with minimal code changes.
- Documented entire pipeline architecture and setup, allowing seamless handoff to internal teams and faster onboarding of new developers.

EDUCATION

Bachelor of Science in Computer Science

Sep 2024 - Present

University of Westminster (via IIT, Sri Lanka)

- Key Modules: OOP (70), Database Systems (83), Software Development Group Project (86), Machine Learning (75), Algorithms (86)

Foundation in Information Technology

May 2023 - December 2023

Informatics Institute of Technology

- Passed with Distinction

GCE Advanced Levels (Physical Science Stream)

Jan 2020 - August 2022

SKILLS

- Languages:** Python, Java, C, C++, R, JavaScript, TypeScript, SQL
- Frameworks & Libraries:** Spring Boot, Flask, FastAPI, Angular, React
- Web Development:** HTML, CSS
- Machine Learning:** Scikit-learn, spaCy, Pandas, Numpy, Stable Diffusion, PaLM, Flux Image Generation
- Mobile:** Flutter
- Database:** MySQL, MariaDB, MongoDB
- DevOps & Cloud:** Docker, GCP (CI/CD Pipelines using Cloud Build, Run & Storage), AWS (EC2, S3 Buckets, ECS)
- UI/UX:** Figma
- APIs & Automation:** Google Ads API, Google Analytics API, OAuth2
- Version Control:** Git, GitHub
- Software Engineering:** REST APIs, Unit Testing, Agile Development, CI/CD, Design Patterns, Data Structures, Algorithms, Object-Oriented Programming

PROJECTS

VisuaLit - AI Powered E-book Reader

- Lead development for VisuaLit, a mobile-first, AI-enhanced eBook reader using **Flutter** (frontend) and **FastAPI** (backend), designed to reimagine traditional reading through multimodal storytelling, currently in closed testing in **Google Play Console**.
- Engineered an agentic NLP pipeline using **spaCy**, **Flux AI**, and an **Firestore**-integrated feedback loop, enabling real-time scene visualizations and character insights. The modular pipeline follows a **Agentic** architecture, supporting context-aware prompt generation and adaptive storytelling based on narrative evolution and reader feedback.
- Implemented backend **CI/CD** pipeline on Google Cloud Platform (GCP) using **Cloud Build** and **Cloud Run**, reducing deployment time by 70%
- Created a marketing website in **React** using **NextJS**, integrated with SEO optimization, leading to more user engagement
- Designed schema and pipelines to handle real-time input parsing, **NLP processing**, and image generation
- Lead the team to win **1st place at CISCO Technopreneur Challenge - CODEFEST**, **2nd place at CodeSprint X**, **3rd place at Cutting Edge** and **Finalists in NBQSA Tertiary Category**

PROJECTS

Ticketr - Event Ticketing System

- Designed and developed a real-time event ticketing platform using **Angular** and **Spring Boot**
- Implemented a producer-consumer pattern on the backend to manage concurrent ticket booking requests
- Used **MySQL** and **Spring Data JPA** for efficient repository access and transaction management
- Built dynamic Angular forms for ticket creation, booking, and input validation
- Developed **RESTful APIs** for complete CRUD operations, supporting seamless frontend-backend interaction
- Demonstrated robust concurrency handling and a scalable, maintainable system architecture, showcasing backend availability under stress-test upto 95%

AI-Powered Solutions for Agriculture, Language Processing, and Banking – Intellihack 3.0 Qualifiers

- Developed a **Random Forest**-based crop recommendation system using Scikit-learn to predict optimal crops based on environmental features
- Built a **Support Vector Machine** classifier for recognizing user intent in natural language queries, incorporating text preprocessing, label encoding, and performance tuning
- Designed a banking service chatbot using LlamaIndex, capable of retrieving structured financial data and responding to user inquiries through semantic search
- Applied advanced data cleaning, feature engineering, and pipelining techniques using tools like Pandas and Joblib to streamline ML workflows
- Addressed overfitting and underfitting concerns through hyperparameter tuning, model selection, and cross-validation
- Evaluated models using AUC-ROC, precision-recall, confusion matrices, and other performance metrics, scoring around 90% in each metrics
- Submitted as a multi-track project set for Intellihack 3.0, where it was selected in qualifier rounds

****More projects can be viewed from Github and Portfolio**

CERTIFICATIONS AND AWARDS

CS50x Introduction to Computer Science

Harvard Online

CS50x Introduction to Python Programming

Harvard Online

Essentials of Data Science

Center for Data Science, University of Colombo

Cutting Edge: Coding Competition (Placed First)

Cutting Edge 2023, Informatics Institute of Technology

CodeSprint X (Placed Second)

IEEE Student Branch of IIT

LEADERSHIP AND VOLUNTEERING

- **Bushmans' Thong** - Scouting (2020)

Led a troop of 120+ scouts, organizing community projects and outdoor camps; earned top-tier district recognition for team performance and coordination.

- **Volunteer** – Prefects' Guild of DSSC(2020/22)

Contributed to the execution of multiple school-wide events, including outreach and logistics for student and academic programs.

- **Head of PR** – Psycho Parade 2025, DSSC OBA

Managed publicity and promotional strategy for 2 consecutive parades with 1500+ participants; produced high-impact media content and led website development coordination.

- **Volunteer** – IIT Clubs & Societies

Supported logistics and operations for university-wide events(IEEE Robotics and EMBS) including a campus Iftar attended by 1500+ participants; coordinated resources across IEEE student chapters.

- **Secretary** – Tamil Literary Association, DSSC (2020/21)

Organized and executed the club's flagship annual project series, reaching over 1500 participants with a multi-event lineup and high-value sponsorships.

- **Assistant Treasurer** – Interact Club of DSSC (2020/21)

Oversaw financial operations and chaired 3 major initiatives, helping the club earn second-highest recognition in district-level Interact evaluations.

- **Chief Editor** - Rotaract Club of Cinnamon Gardens (2025/26)

Managing a PR and Editorial Team, with around 5 members to promote the club and ensure visibility across events
