

Kahoot Question Bank: The BIS Edition

Question 1: The Requirement Paradox

Question: The client says “I want the system to be ‘Easy to use’”. As a BA, what is the problem?

- A. It’s a great requirement!
- B. “Easy” is subjective and not measurable
- C. Developers love vague requirements
- D. It’s too specific **Correct Answer:** B (“Easy” means nothing. “3 clicks to checkout” means something.)

Question 2: Scope Creep

Question: It is 2 days before deadline. The client asks for a “Small feature: A Chatbot”. What is this called?

- A. Agile Development
- B. A friendly request
- C. Scope Creep
- D. Innovation **Correct Answer:** C (The enemy of all projects!)

Question 3: The Gap Analysis

Question: What is a “Gap Analysis”?

- A. Finding the gap in the fence
- B. Comparing “Current State” vs “Desired Future State”
- C. Analyzing why the code is broken
- D. Testing the gap between buttons **Correct Answer:** B

Question 4: Stakeholder Management

Question: The CEO wants X. The Users want Y. The Devs want Z. Who do you listen to?

- A. Only the CEO (He pays)
- B. Only the Devs (They build)

-
- C. You facilitate a workshop to find the “Business Value” compromise
-
- D. You quit **Correct Answer: C** (Welcome to the life of a BA/PM)

Question 5: Legacy Systems

Question: Why do banks still use 30-year-old systems?

-
- A. They like vintage stuff
-
- B. It is too risky and expensive to replace them
-
- C. They forgot the password
-
- D. No one knows how to code anymore **Correct Answer: B** (Risk mitigation is key in BIS)

Question 6: UAT (User Acceptance Testing)

Question: When does UAT happen?

-
- A. Before coding starts
-
- B. After the internal testing, before Go-Live
-
- C. Never
-
- D. Whenever the user feels like it **Correct Answer: B**

Question 7: The Agile Myth

Question: Does “Agile” mean “No Documentation”?

-
- A. Yes, write nothing!
-
- B. No, it means “Just Enough Documentation”
-
- C. Agile is just a buzzword
-
- D. It means we change requirements every hour **Correct Answer: B**

Question 8: The Developer vs BA

Question: A Developer tells you “This feature is impossible.” What do you do?

-
- A. Believe them immediately
-

B. Ask: “Is it impossible, or just really hard/expensive?”

C. Fire them

D. Learn to code yourself **Correct Answer: B** (Usually it’s just hard, not impossible. Your job is to check the ROI.)

Question 9: GDPR

Question: You are storing User Emails. What must you ensure?

A. That you sell them to advertisers

B. That you have Consent and a Privacy Policy

C. That you print them out

D. Use them for your newsletter without asking **Correct Answer: B**

Question 10: The MVP

Question: What does MVP stand for in Startup/Agile terms?

A. Most Valuable Player

B. Minimum Viable Product (Smallest thing that works)

C. Maximum Viable Product (Everything included)

D. Most Viable Person **Correct Answer: B**
